Art Unit: 3676

1. The following is an examiner's statement of reasons for allowance:

The primary reason for the allowance of claims 1-60 is that none of the references cited, taken either singly or in combination, teach or disclose a method of creating a permeable resinous mass or effecting sand control in a subterranean formation, as set forth in the claimed combinations, including a step of activating the acid curable resin using an activator, and which activation both cause the acid curable resin to substantially cure and aids in degrading the degradable material. For example, the references to Nguyen et al (2004/0261995), Blauche et al (2005/0059558), Chatterji et al (6,543,545) or Betzold (6,114,410), disclose processes for sand control or fracturing and propping a subterranean formation utilizing an exemplary resin slurry or formulation further including a degradable material, however such references, along with other cited prior art, fail to teach degrading such degradable material using the activator for curing or setting the acid curable resin component, as required by the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to George Suchfield whose telephone number is 571-272-7036. The examiner can normally be reached on M-F (6:30 - 3:00).
